

## NEWS RELEASE

### **MCare Solutions, Inc. Announces New Service for Teaching Hospitals**

**July 1, 2009 – Houston, Texas**

MCare Solutions, Inc. (MCare), the nation's first provider of Transfer DRG reimbursement recovery services, announces an additional service for the provision of revenue recovery services associated with missed Indirect Medical Education (IME) / Graduate Medical Education (GME) reimbursements.

Medicare Advantage plans are not required to reimburse teaching hospitals for IME/GME payments. MCare is able to conduct retrospective review of Medicare Advantage and Commercial payer admissions to provide teaching hospitals with the necessary information to submit an IME/GME claim to CMS. By utilizing MCare services, retroactive IME/GME reimbursements are available to hospitals to the beginning of the timely filing period.

"MCare is committed to finding niche revenue reimbursement opportunities for the hospital industry. There are more than 1,100 teaching hospitals in the country, each of whom is eligible to receive reimbursement from CMS if the necessary and correct information is captured in order to submit the IME/GME claim. Through our existing proprietary systems and services, MCare is able to provide this significant source of revenue for our client hospitals," says David Jupp, President and Founder of MCare Solutions, Inc.

#### ***About MCare Solutions, Inc.***

*MCare was founded in 2005 as the first provider of Transfer DRG reimbursement recovery services for acute care providers. To date, MCare has reviewed and analyzed millions of Transfer DRG discharges and is responsible for more than \$65 million in reimbursements to client hospitals. The initial focus of Medicare fee for service accounts has since expanded to include acute care discharges related to Medicare Advantage payers and IME/GME reimbursement. MCare now represents more than 300 for-profit and not-for-profit hospitals from Alaska to Florida, including individual community hospitals that range in size from <100 to 1,000-plus beds and regional and national healthcare systems.*
